

MIR JASIMUDDIN

Senior UiPath Agentic Automation Associate

i.mir.jasim.uddin@gmail.com | +91 9382859763 | Kolkata, India | [linkedin.com/in/mir-jasimuddin-4a35131a0](https://www.linkedin.com/in/mir-jasimuddin-4a35131a0) | imirjasimuddin.netlify.app

PROFESSIONAL SUMMARY

Senior UiPath Agentic Automation Associate with 4+ years of end-to-end automation experience across Capgemini and TCS, now focused on agentic automation: multi-agent orchestration, coded agents, and governed autonomous digital workers. UiPath Certified Agentic Automation Associate applying Maestro orchestration, Coded Agents/C# SDK, Claude Code and Codex, Claude API integration, MCP server connectivity, and AI Trust Layer governance ("Trust by Design") to move automation from isolated bots to production-grade, self-governing agent systems. UiPath Community Automation Champion 2026, 5x UiPath Monthly Forum Rewards winner, and active UiPath Community Kolkata contributor.

CORE SKILLS

- **Agentic AI & Orchestration:** UiPath Maestro (BPMN/DMN), Agent Builder, Coded Agents, Multi-Agent Systems, ScreenPlay, Autopilot
- **AI-Native Integration:** Claude Code, Codex, Claude API, MCP Server Integration, GenAI-Powered Workflow Design
- **Automation Platform:** UiPath Studio/Studio Web/Orchestrator, AI Center, Test Cloud, REFramework, IXP (Extraction/Validation Agents)
- **Governance & Security:** AI Trust Layer, Governance-as-Code, PII Masking, CyberArk PAM, Audit Controls
- **Integration & Infra:** REST APIs, Webhooks, OAuth2, SSH/Terminal & CLI Automation, SAP HANA, SQL/MariaDB
- **Languages & DevOps:** Python, C#, VBA, SQL, Git, CI/CD, Agile/Scrum
- **Domain Expertise:** Financial Services, Utility, Case Processing, Document Management, Auditing, Regression Testing, Reporting
- **Consulting & Delivery:** Stakeholder Collaboration, Process Analysis, Solution Design, PDD/SDD/UAT Documentation, Mentoring, Team Leadership

CERTIFICATIONS

- UiPath Certified Professional – Agentic Automation Associate
- UiPath Community Certification Framework – Specialized AI Professional
- UiPath Academy – Automation Business Analyst Associate
- Automation Anywhere – Certified Master RPA Professional (Prep)

PROFESSIONAL EXPERIENCE

Capgemini Technology Services India Limited | Kolkata, India

Jan 2025 – Present

Senior Associate – Senior UiPath Agentic Automation Associate

- Lead agentic automation design and delivery for enterprise clients, owning solution architecture from discovery through production go-live.
- Mentor a small automation team on Maestro orchestration, Coded Agents, and AI-native development practices.
- Completed full VDI and Orchestrator environment setup from scratch, then automated intake across scan, fax, and email channels with queue management and validation.

Tata Consultancy Services | Kolkata, India

Jul 2022 – Jan 2025

System Engineer – UiPath RPA Developer

- Designed and deployed multiple enterprise UiPath processes end to end – requirements analysis through UAT to production deployment.
- Migrated bot infrastructure from on-premises Orchestrator to UiPath Automation Cloud with zero downtime and full governance continuity.
- Integrated CyberArk PAM-based secure credential management across all automated processes, enforcing rotation-safe authentication standards.
- Re-architected workflows across multiple automations – updating selectors, process maps, and component libraries to improve reliability and runtime performance.
- Provided proactive production monitoring, bot troubleshooting, and performance optimization across critical business operations.

KEY PROJECTS

GenAI-Assisted RPA Development with Claude Code and Codex

May 2026 – Present

- Integrated Claude Code and Codex into the UiPath Studio development workflow for AI-assisted, AI-native workflow scaffolding.
- Used the Claude API for automated exception-handling suggestions and GenAI-powered code review inside Studio IDE.
- Implemented Claude API-driven dynamic process routing and context-aware automation decision-making at runtime.
- Applied Claude-based intelligent document classification to reduce manual triage in downstream processes.
- Piloted multi-agent collaboration patterns pairing Claude reasoning with UiPath execution.

Coded Automation Framework with UiPath Coded Agents

Jan 2026 – Apr 2026

- Architected a reusable enterprise coded-agent framework on UiPath Coded Agents and the C# SDK for a financial services client.
- Built a custom activity library enabling direct microservice integration and code-first automation across multi-step processes.
- Reduced automation development cycle time by standardizing reusable coded components across teams.
- Improved runtime stability of complex processes through code-first exception handling and structured logging.
- Established coding standards and review practices aligned with UiPath's shift toward autonomous, code-first digital workers.

External API & MCP Integration Hub for Enterprise RPA

Sep 2025 – Dec 2025

- Built a centralized integration layer connecting third-party REST APIs, webhooks, and MCP servers for real-time cross-platform orchestration.
- Implemented OAuth2-based secure authentication, intelligent retry logic, and structured error handling for high-volume production API flows.
- Automated server-side operations via SSH-based remote script execution and CLI-driven batch job orchestration.
- Built headless PowerShell/Bash automation pipelines for scheduled maintenance and data-pipeline triggers with no UI dependency.
- Enabled agent-to-tool connectivity through MCP, positioning the automation estate for agentic interoperability.

Enterprise Case Lifecycle Management with Maestro

May 2025 – Aug 2025

- Designed a full UiPath Maestro case management solution orchestrating intake, assignment, SLA tracking, escalation, and resolution.
- Configured BPMN/DMN decision models for intelligent case routing and priority-based escalation, cutting manual intervention.
- Extended the same orchestration core to large-scale case update automation across enterprise systems in production.
- Built IXP-based document management and Extraction Agent workflows for contingency case processing.
- Delivered a centralized control-plane view of case status for governed, orchestrated case handling.

Agentic Regression Testing & AI Trust Layer Governance

Jan 2025 – Apr 2025

- Automated client Golden Test Suites in UiPath Test Cloud using self-healing automation, AI computer vision, and agentic performance testing.
- Implemented REFramework with queue-based dispatching, IXP Extraction/Validation Agents, and GenAI Autopilot, integrated into CI/CD pipelines.
- Delivered production auditing automation using IXP Validation Agents for AI-enabled document validation and compliance checks.
- Applied AI Trust Layer governance and audit-bypass handling to keep autonomous validation steps compliant and traceable.
- Embedded governance-as-code guardrails into agentic test flows, reflecting the industry shift to "Trust by Design."

COMMUNITY LEADERSHIP & RECOGNITION

- UiPath Community Automation Champion 2026 – recognised for sustained technical contribution, mentoring and advocacy across the UiPath ecosystem.
- 5x UiPath Monthly Forum Rewards winner; active UiPath Community Forum and UiPath Community Kolkata contributor and speaker.
- Delivered freelance training/mentorship on UiPath RPA, Agentic AI, GenAI automation, and Claude Code integration;

published a 100-day LinkedIn automation series.

EDUCATION

Bachelor of Technology (B.Tech) – Maulana Abul Kalam Azad University of Technology, Kolkata (2018 – 2022)
